The Big Idea

A Live Artifact is a real page Claude builds that stays pinned in your sidebar. Every time you open it, it talks to your connectors — Gmail, Calendar, Stripe, web search — and shows fresh data. Not a static report; a living dashboard you own.

HOW THEY WORK

Paste a prompt, Claude builds the page, you pin it to your sidebar. No refresh button, no manual work — it pulls the latest every time you open it.

Pick the one that fixes your biggest daily annoyance and start there — you don't need to build all five.

1 • Morning Command Center

Needs: Gmail, Google Calendar

Your whole day on one page — top emails, full schedule, top three priorities. Refreshes every time you open it.

PROMPT

Build me a Live Artifact called Morning Command Center. When I open it, pull today's events from my Google Calendar, the top 3 emails from my Gmail inbox that need a reply, and a section for my top 3 priorities for the day. Make it clean and easy to scan in 30 seconds.

2 • Revenue Tracker

Needs: Stripe, Gmail

Live payments, deal pipeline, and outstanding invoices in one place.

PROMPT

Build me a Live Artifact called Revenue Tracker. Pull my recent Stripe payments and current MRR. Scan my Gmail for any active deal threads. List any outstanding invoices, with the total owed and how many days overdue.

3 • Meeting Prep Dashboard

Needs: Gmail, Google Calendar

Right before a call, shows who's joining and three quick talking points based on your past conversations with them.

PROMPT

Build me a Live Artifact called Meeting Prep. List every meeting on my Google Calendar for the next 24 hours. For each one, show who I'm meeting with, the most recent email threads with them, and 3 talking points from our last conversation.

4 • Competitor Tracker

Needs: Web search

Pulls trending content in your niche daily, so you always know what's working before you scroll for it yourself.

PROMPT

Build me a Live Artifact called Competitor Tracker. Every time I open it, pull the top 10 trending videos in [YOUR NICHE] from the last 24 hours — title, creator, view count, and topic. Highlight any patterns you notice.

5 • Skills Dashboard

Needs: none

Every Cowork skill you've built, in one place — names, descriptions, usage — so you can spot what's worth keeping.

PROMPT

Build me a Live Artifact called Skills Dashboard. Show every skill I've built in my Cowork account, what it does in plain English, and how often I've used it in the last 30 days. Flag any I haven't used so I can clean them up.

How to Set One Up

1

Turn on connectors

Settings → Connectors. Hook up whatever the prompt needs.

2

Paste one prompt

Just one — don't try to build all five at once.

3

Watch it build live

Tweak once if something's off — tell Claude what to change and it rebuilds.

4

Pin it to your sidebar

One click, every time, fresh data.

PRO TIP

Use it for a week before adding the next one. The goal is a daily habit, not a fancy collection of pages you never open.

Do This Today

01 Turn on Gmail and Google Calendar in Connectors.

02 Paste the Morning Command Center prompt into a new chat.

03 Pin it to your sidebar and open it tomorrow morning.
